

WETLANDS & HUMAN WELLBEING

World Wetlands Day • 2 February 2024

ENSURING CLEAN WATER

Wetlands act as natural filters, removing pollutants and excessive nutrients.

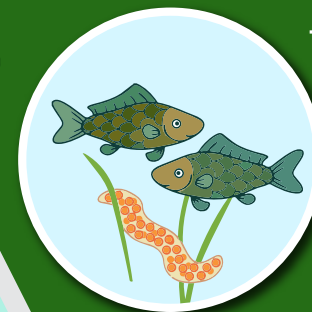

AIDS WATER SECURITY

Wetland ecosystems form a vital link with groundwater ecosystems.

NURSERY HABITAT

Coastal and estuarine wetlands serve as crucial nursery habitats for numerous fish species.

SPAWNING GROUND

Wetland ecosystems are vital breeding grounds for a variety of fish species.

FOOD SOURCE

Wetlands support diverse organisms, providing a rich and abundant menu for fish, birds and people.

BE VIGILANT: Report illegal activities threatening wetlands promptly, such as dumping, draining, or unauthorized construction.

National Environmental Crimes Hotline: 0800 205 005 (24 hours) to report incidents and help authorities take necessary actions.
